

What does it mean to choose one of the nation's leading rehabilitation hospitals? It means never having to worry about the quality of your care. So you can focus on getting better, and getting back to living.

Spaulding Rehabilitation Hospital Boston is one of the largest rehabilitation facilities in the United States and has been consistently ranked by *U.S. News & World Report* as one of the top rehabilitation hospitals in the country. As the official teaching hospital of the Harvard Medical School Department of Physical Medicine and Rehabilitation (PM&R), we are at the forefront of research in advances in rehabilitative care. That means you can count on world-class treatment from every one of our doctors, nurses, therapists and caregivers.

The skill of our clinicians is matched only by their dedication to their patients. Whatever your goals—whether it's getting back on your feet after a serious injury or working toward greater independence—our caregivers support you and your loved ones at every step. Rehabilitation is not just about strengthening the body. It's about strengthening the spirit.

Since 1995, Spaulding Rehabilitation Hospital Boston has been consistently ranked by *U.S. News & World Report* as one of the top hospitals in the country.

Spaulding Rehabilitation Hospital Boston is the founding institution of the Spaulding Rehabilitation Network. Through our network, you have access to a full continuum of rehabilitative care, with 6 inpatient facilities and 23 outpatient centers, from Cape Ann to Cape Cod. Our mission is to provide exceptional clinical care, promote medical education and advance research.

The Spaulding network's facilities are members of Partners HealthCare, founded by Massachusetts General Hospital and

Brigham and Women's Hospital. At Spaulding Rehabilitation Hospital Boston, because we are part of Partners HealthCare, the knowledge and expertise of the entire system will be available to you and your caregivers. This continuum of superb healthcare ensures that you will always find the exact care you need throughout your journey and the strength you need to live your life to the fullest.

Spaulding is accredited by the Commission for Accreditation of Rehabilitation Facilities (CARF) for its Comprehensive Integrated Inpatient Rehabilitation Program, Brain Injury Program, Spinal Cord System of Care and Stroke Specialty Program.

Our interdisciplinary approach allows us to treat the whole patient, based on their individual needs.

The inpatient rehabilitation programs at our 132-bed Charlestown facility include Stroke, Brain Injury, Spinal Cord, Orthopedic/Trauma, Pediatric, Amputee, Burn and Neurological. We offer comprehensive physical, occupational and speech therapy services, as well as specialty rehabilitation services such as an Assistive Technology Center, Gait Laboratory and Adaptive Sports and Recreation Programs. Spaulding clinicians use the most advanced treatments and technologies to help patients reach their highest potential.

Our clinical teams are led by rehabilitation physicians and are supported by physician specialists and on-site diagnostic and treatment services. Many of our physicians are involved in clinical research to help discover ways to further improve patient outcomes.

In each of our programs, our on-site rehabilitative specialists work as a team to address your unique needs. They constantly adapt and fine-tune therapies along the way, modifying different approaches as needed to get the best results. In short, they never give up on you.

Spaulding has been selected as a Model Systems site for programs in Traumatic Brain Injury, Spinal Cord Injury and Burn Injury Rehabilitation by the National Institute on Disability and Rehabilitation Research (NIDRR). We are proud of the fact that our clinical outcomes, as measured by national industry standards, exceed regional and national averages.

We help families find strength, too.

Patients and their families are the most important members of our rehabilitative teams. Our clinicians will keep you informed and involved every step of the way, to ensure that we are working together to achieve your specific goals. We offer a number of education and support services, including a Patient and Family Resource Center, to help prepare you for discharge.

Our unique approach to therapy includes use of the resources of our waterfront building and our local Boston community—from practicing mobility skills on different surfaces to visiting the Museum of Science—to help you develop skills necessary for recovery. No matter what your rehabilitative needs, no matter how challenging your condition, we help you and your loved ones find the strength you need to move forward. It's our mission and our promise to you.

Spaulding Strength
